Coffee Grinders and Salt and Pepper Mechanisms

Prime Range

Quality mechanisms manufactured in Denmark. The salt mechanism is made from aluminium and plastic to avoid corrosion and the pepper mechanism is made from steel. They are complete with the necessary fixing plates.

Standard Range

A range of high quality, imported mechanisms made from the best materials for practical use. They are nickel plated steel with 3 cross bars for the pepper mechanism and 2 cross bars for the salt mechanism, both have a brass top knob.
